

FTB-3930

MULTITEST MODULE

EXFO Connect
Compatible

Provides fully automated bidirectional loss test results in 10 seconds for up to three wavelengths, as well as automatic ORL and fiber-length measurement.

KEY FEATURES

FasTes™: three-wavelength measurement of optical loss, ORL and fiber length in 10 seconds

All-in-one portable test solution: up to eight instruments combined in a single module

FTTx ready: allows for the testing of passive optical networks (PONs) at 1310 nm, 1490 nm and 1550 nm, the three wavelengths recommended by the ITU-T [G.983.3] for PONs

Cost of ownership: lowest in the industry, thanks to three-year warranty and recommended calibration interval, error-free testing and minimized training time

EXFO Connect-compatible: automated asset management; data goes through the cloud and into a dynamic database

PLATFORM COMPATIBILITY

Platform
FTB-2 / FTB-2 Pro

Platform
FTB-200

Platform
FTB-500

EXFO'S NEXT-GENERATION MULTITEST MODULE: MORE FEATURES, BETTER PERFORMANCE

The new FTB-3930 MultiTest Module is designed to help network service providers address CAPEX and OPEX issues, enable installers to easily adapt to all network types, and provide CATV operators with a single-module solution to their backreflection, fiber-length, high-power and bidirectional loss measurement needs. Combined with a video fiber inspection probe and an OTDR, this solution lets you easily detect dirty or damaged connectors, providing a clear view of connectors and fiber ends and enabling complete link characterization.

All-in-one unit: combines up to eight instruments

- › Loss meter
- › Power meter
- › Optical return loss (ORL) meter
- › Visual fault locator
- › Multimode and singlemode light sources
- › Digital talk set
- › Fiber-length meter

FasTesT function*: one-touch, automated measurements in 10 seconds

- › Bidirectional loss and ORL testing at up to three singlemode wavelengths
- › Bidirectional loss testing at two multimode wavelengths
- › Fiber-length measurement

Flexible solution: five-wavelength multimode and singlemode configurations meeting the requirements of installers/contractors for all test situations

- › Up to three singlemode wavelengths—1310 nm, 1550 nm and a choice between 1490 nm and 1625 nm—on one port
- › Two multimode wavelengths—850 nm and 1300 nm—on a second port

Future-proof: next-generation features meeting the latest industry requirements

- › User-configurable pass/fail thresholds that can be adjusted to different industry standards
- › FTTx ready, allowing for the testing of passive optical networks (PONs) at 1310 nm, 1490 nm and 1550 nm, the three wavelengths recommended by the ITU-T (G.983.3) for PONs

Cost of ownership: lowest on the market

- › Three-year warranty and recommended calibration interval
- › Error-free testing achieved through visual loss and ORL pass/fail analysis
- › Minimized training time, thanks to a single user interface for the eight instruments included in this all-in-one unit

FTB-2-FTB-2 Pro Platform

FTB-200 Compact Platform

FTB-500 Platform

With countless configurations and combinations available, the FTB-3930 is ideal for today's network service providers, fiber-optic network installers/contractors and CATV operators.

*Protected by US patent 5,305,078.

FTTx-READY: OPTIMIZED FOR TESTING PASSIVE OPTICAL NETWORKS

FTTx-Mode Operation

This mode lets you configure your FTB-3930 module to suit your FTTx wavelengths and test-unit locations, as well as choose your preferred data presentation options for on-screen display or report generation. Key benefits include:

- › Display of test data according to FTTx terminology
- › Similar test-data presentation, regardless of the location of master and remote units

Master date: 10/16/2004 10:59:15 AM

FastestT					
λ (nm)	Loss CO → Premise (dB)	Loss Premise → CO (dB)	Loss Average (dB)	ORL CO → Premise (dB)	ORL Premise → CO (dB)
1310 (Up stream)	21.47	22.73	22.71	41.23	37.76
1490 (Down stream)	21.04	21.47	21.25	32.51	41.23
1550 (Down stream)	21.04	21.47	21.25	32.51	41.23

FastestT 3930 (SM)

Integrated Data Storage Management

This feature enables the FastestT initiator to save results on a remote unit—even when multiple remote units are used. Key benefits include:

- › The possibility to store test data in a single unit
- › Easier data post-processing and transfer from the FTB-3930 module (see figure below)
- › Point-to-Multipoint Testing with Multiple Referencing

Implemented in the FTB-3930 MultiTest Module, multiple referencing lets you coordinate the FTB-3930 with up to 10 remote FOT-930 MaxTester units. Key benefits include:

- › First-class efficiency, as several technicians can simultaneously install and test distribution fibers

The FTB-3930 allows for automated bidirectional loss and ORL testing of passive optical networks (PONs) at 1310 nm, 1490 nm and 1550 nm, the three wavelengths recommended by the ITU-T (G.983.3) for PONs.

A SINGLE TOOL FOR ALL BACKREFLECTION, FIBER-LENGTH AND LOSS MEASUREMENT NEEDS

Because learning how to operate only one instrument is easier and much faster, test specialists should choose an all-in-one tool that enables them to perform tasks such as installing long-haul high-speed networks, testing 1310/1490/1550 nm transmission in FTTH networks, performing multimode testing in enterprise networks, etc.—a do-it-all solution such as the FTB-3930 MultiTest Module.

Key Advantages for All Network Types

- › Fast, three-wavelength loss and ORL testing
- › User-configurable pass/fail thresholds for error-free testing
- › The only unit designed for testing both multimode and singlemode fiber
- › Video fiber inspection probe, for easy viewing of connectors and fiber ends on the FOT-930's high-resolution display
- › GeX detector, for high-power measurement up to +26 dBm
- › Complete report generation capabilities
- › Talk set and VFL options
- › Ease of use, for faster testing, reduced training, minimum error potential, etc.

KEY FEATURES

Two FasTesT ports: a three-wavelength singlemode port, including either 1625 nm or 1490 nm, and a two-wavelength multimode port, for a total of up to five wavelengths

Automatic measurement of ORL and fiber length during FasTesT

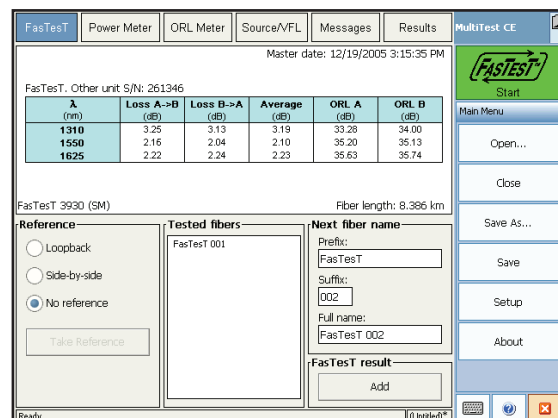

Visual loss and ORL pass/fail analysis

Field-swappable rechargeable batteries

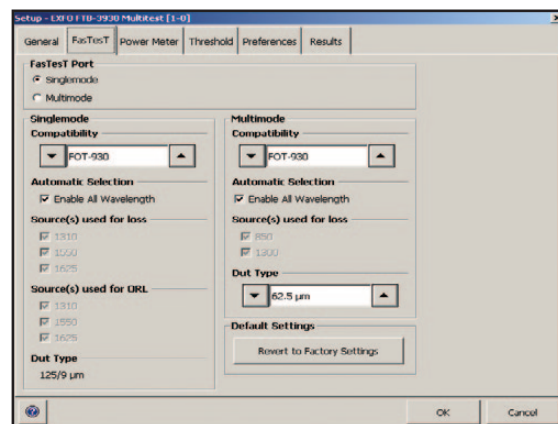

Easily accessible connectors

Options: high-power detector, talk set and visual fault locator (VFL)

No offset nulling required

In 10 seconds, the FTB-3930's FasTesT function provides insertion loss and ORL values for up to three wavelengths—including either 1490 nm or 1625 nm—on a single port (FTB-500 interface).

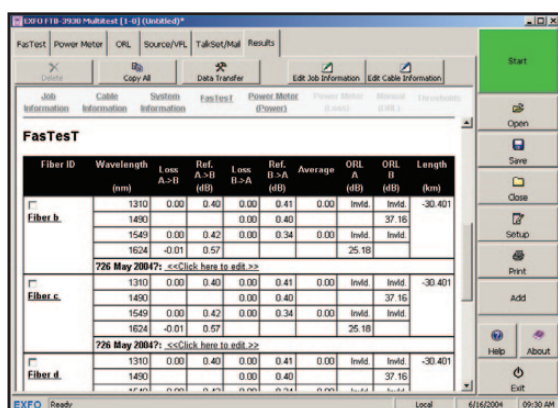

While performing FasTesT measurements, the FTB-3930 can launch automated loss and ORL measurements on all three wavelengths and perform fiber-length measurements.

STANDARD DATA REPORTING FEATURES—FTB-3930 BUILT-IN APPLICATION

The FTB-3930's software automatically sets up test data in easy-to-read, well-organized table. What's more, thousands of test results can be saved directly on the FTB Ecosystem platforms.

Testing is simplified thanks to the highly intuitive user interface and integrated test functions, taking software user-friendliness to the next level.

- › Select predefined test parameters and pass/fail thresholds
- › Customize user settings and cable identification parameters
- › Add operator comments
- › Generate reports for ORL, bidirectional loss (three wavelengths) and fiber-length measurement
- › Interface available in English and Russian

The screenshot shows the 'FasTest' window of the EXFO software. It displays a table with the following columns: Fiber ID, Wavelength (nm), Loss A-B (dB), Ref. A-B (dB), Loss B-A (dB), Ref. B-A (dB), Average (dB), ORL A (dB), ORL B (dB), and Length (km). The table contains data for three fiber types (Fiber b, Fiber c, Fiber d) at three wavelengths (1310, 1490, 1550 nm). The status bar at the bottom indicates 'EXFO Ready' and the date/time '6/14/2004 09:30 AM'.

Display comprehensive test results thanks to the FTB-3930's data management software.

The screenshot shows a printed report titled 'FasTestReport'. It contains a table with the following columns: Fiber ID, Wavelength, Loss A-B, Loss B-A, Mean, ORL A, ORL B, and Length. The report lists test results for fibers FIBER038 through FIBER045. Each fiber entry includes data for three wavelengths (1310, 1550, 1625 nm) and a 'FiberComment' field. The report is formatted as a professional document with a header and a footer.

Quickly and easily generate detailed reports.

FAST-TRACK DATA POST-PROCESSING WITH FASTREPORTER 2 SOFTWARE

FastReporter 2 includes a powerful tool that **automates repetitive operations on large numbers of test files**. You can process an unlimited number of files in a session, and combine single operations into multi-operation batch sessions. In a nutshell, FastReporter 2 optimizes your productivity.

Batch documentation

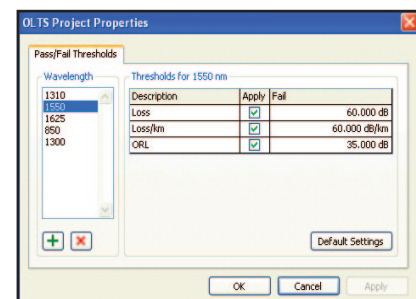

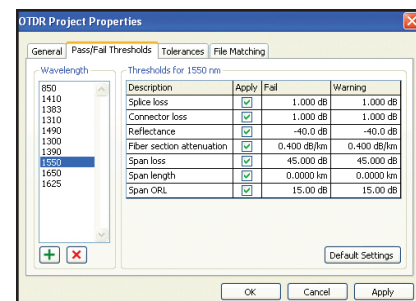

- Document an entire cable/project in a matter of seconds
- Save time in the field by documenting your files at the office
- Manage different measurements simultaneously

Get uniformity in your results

- Adjust cable and fiber parameters
- Set detection thresholds for all measurements at once

Batch analysis

- Adjust parameters for all cables at once
- Adjust detection thresholds
- Set pass/fail thresholds for OTDR, OLTS, CD and PMD testing and characterize your link. Make sure you meet the link's requirements.

Flexible Reporting

Various report templates to choose from

- ✓ Loss and ORL (including EXFO's FasTesT function)
- ✓ OTDR
- ✓ PMD
- ✓ Chromatic dispersion (CD)
- ✓ Fiber characterization
- ✓ Cable report

OTDR cable report.

Fiber characterization report.

- One cable report replaces hundreds of single-fiber test printouts, simplifying and speeding up high-fiber-count data management. This report automatically provides per-event and per-fiber statistics and flags threshold-exceeding values. It also generates end-to-end reports for one or many wavelengths.

Report customization

Create your own report template with external reporting software such as Crystal Reports®.

Format saving

Easily create comprehensive PDF, Excel or HTML reports, with no additional formatting.

Copy Graph function

Customize your reports by integrating your graphs into documents such as Excel, Word, etc.

For more details on FastReporter 2, visit the [FastReporter 2 product page on EXFO's website](#).

AUTOMATE ASSET MANAGEMENT. PUSH TEST DATA IN THE CLOUD. GET CONNECTED.**EXFO | Connect**

EXFO Connect pushes and stores test equipment and test data content automatically in the cloud, allowing you to streamline test operation from build-out to maintenance.

ADDITIONAL SOFTWARE TEST CAPABILITIES ON THE FTB-1 PLATFORM**EXpert VoIP
TEST TOOLS**

EXpert VoIP generates a voice-over-IP call directly from the test platform to validate performance during service turn-up and troubleshooting.

- › Supports a wide range of signaling protocols, including SIP, SCCP, H.248/Megaco and H.323
- › Supports MOS and R-factor quality metrics
- › Simplifies testing with configurable pass/fail thresholds and RTP metrics

**EXpert IP
TEST TOOLS**

EXpert IP integrates six commonly used datacom test tools into one platform-based application to ensure that field technicians are prepared for a wide range of testing needs.

- › Rapidly performs debugging sequences with VLAN scan and LAN discovery
- › Validates end-to-end ping and traceroute
- › Verifies FTP performance and HTTP availability

**EXpert IPTV
TEST TOOLS**

This powerful IPTV quality assessment solution enables set-top-box emulation and passive monitoring of IPTV streams, allowing quick and easy pass/fail verification of IPTV installations.

- › Real-time video preview
- › Analyzes up to 10 video streams
- › Comprehensive QoS and QoE metrics including MOS score

Relative humidity		0% to 95% non-condensing		
Warranty (years)		3		

Notes

- a. At 23 °C ± 1 °C and 1550 nm with FC connector and on batteries, unless otherwise specified.
- b. Resolution, uncertainty and linearity are functions of input power; uncertainty is valid at calibration conditions.
- c. Up to 20 dBm for GeX.
- d. Power of > -45 dBm for Ge, > -30 dBm for GeX and > -47 dBm for InGaAs.
- e. In High source mode.
- f. As defined by Telcordia TR-TSY-000887, rms for lasers and at -3 dB for LEDs; typical values for LEDs.

g. After a warmup time of 6 minutes, in CW source mode.

h. Typical value, at 1550 nm for SM and 850 nm for MM.

i. Typical value.

j. For fiber length ≤ 120 km.

k. For graded-index MM fibers; typical.

STANDARD ACCESSORIES

User guide, Certificate of Calibration, connector adapter (FOA) according to chosen connector and mandrel.
